

PRAJIT GIRI

U.S Permanent Resident | prajitgiri1221@gmail.com | Cell: 857-317-9276 | [LinkedIn](#) | San Antonio, TX 78209

EDUCATION

Fisher College, Boston, MA

May 2025

Bachelor of Science in Management; Finance Concentration

Cumulative GPA: 3.86 | Dean's List | Summa Cum Laude

Relevant Coursework: Financial Accounting, Managerial Accounting, Corporate Finance, Financial Analysis, Budgeting, Risk Management (12+ semester hours completed)

BRAC University, Dhaka, Bangladesh

Bachelor in Business Administration; Finance and Accounting Major

February 2021 – March 2023

Cumulative GPA: 3.59 | Full ride scholarship | OSUN & CEU exchange candidate

TECHNICAL & ANALYTICAL SKILLS

Data Analytics: Python (pandas, NumPy, scikit-learn basics), Jupyter, Excel (advanced formulas, pivot tables), Power BI, Tableau

Data for Government: Policy dashboards, fraud detection logic, risk scoring models, financial oversight analytics

Finance & Risk: Credit risk concepts (DTI, LTV, default probability), portfolio analysis, basic financial modeling

Reporting & Presentation: PowerPoint, Word, written reports and summaries for technical and non-technical audiences

Programming: Python, HTML/CSS/JS (foundational), basic React

Accounting & Fiscal Tools: Financial accounting principles, budgeting concepts, reconciliation, documentation, GAAP basics

Language: English (fluent), Nepali (native), Hindi (conversational), Bengali (basic)

Certifications: Python for Data Science by IBM (2023), Public Finance & Economic Policy by Bard College (2024), Excel for Business by Macquarie University (2025), Bookkeeping essentials by Intuit (2025), Financial statement analysis by Intuit (2025), Google Advanced Data Analytics by Google (2025).

RELEVANT PROJECTS

Public Financial Oversight & Fraud Detection System ([View](#))

- Built a Python-based fraud detection system using a synthetic dataset of 1,000 transactions (transaction ID, customer ID, amount, channel, timestamp, country, merchant, status).
- Implemented rule-based checks for unusual amounts (>95th percentile), duplicate transactions (within 10 minutes), high-frequency bursts (>3 transactions per hour per customer), and high-risk countries.
- Generated a fraud investigation report summarizing total flagged transactions, fraud percentage, and total flagged dollar amount, and exported flagged_transactions.csv for investigator review.
- Created a multi-panel dashboard showing fraud type distribution, clean vs. flagged activity, top suspicious customers, high-risk geographies, and daily transaction volume.

Community Lending & Economic Access Risk Model– 500 Applicant Portfolio ([View](#))

- Designed a synthetic portfolio of 500 loan applicants with realistic banking attributes (income, debt, loan amount, term, credit score, collateral value, employment status).
- Engineered key risk metrics such as DTI, LTV, monthly obligations, and risk tiers, then applied a rule-based underwriting policy (Approve / Review / Reject) aligned with common bank thresholds.
- Labeled default outcomes based on risk triggers (low credit score, high DTI, high LTV) and trained a logistic regression model to estimate default probability.
- Compared policy-based and model-based decisions and summarized portfolio risk distribution to show how data-driven methods can support safer, more consistent lending.

Cyber Log Analysis for Public Safety & Digital Accountability ([View](#))

- Created a small synthetic system log dataset with timestamps, users, source IPs, actions, and statuses to simulate authentication logs.
- Applied simple SOC-style rules to detect brute-force attempts (three or more failed logins in a short window), late-night activity (00:00–05:00), and “failed → success” patterns that may indicate compromised credentials.
- Implemented detection logic using both Excel (filters, helper columns, time calculations) and Python (loops, conditions, basic DataFrame operations).
- Produced an alert summary table listing users, events, and suspicious patterns, reinforcing foundational skills in log review and anomaly identification.

San Antonio Civic Data Dashboard — Housing, Transit & Community Trends – **Vibe code** ([view](#))

- Built a civic dashboard using San Antonio Open Data (housing, transit, demographics) by cleaning, merging, and visualizing datasets to reveal neighborhood-level disparities in affordability and transit access.
- Identified data-driven indicators that city agencies could use for planning, highlighting gaps affecting low-income communities and demonstrating how dashboards can support equitable public service delivery.

PUBLIC SERVICE & LEADERSHIP EXPERIENCE

Teacher — Algebra I & Advanced Algebra I

July 2025 – November 2025

Idea Public School, San Antonio, United States

- Built and maintained structured student-performance trackers using Excel; identified trends and discrepancies similar to fiscal monitoring.
- Applied data-driven approaches to problem-solving and documentation.
- Collaborated on school-wide planning aligned to operational goals and compliance requirements.

Corps Member

Summer 2025

Teach for America, San Antonio, United States

- Selected for a national teaching corps focused on equity and community-based impact.
- Completed intensive training in culturally responsive instruction, leadership development, and data-driven teaching.
- Engaged in DEI seminars and coaching sessions centered on long-term community impact.

Public Safety Dispatcher

Feb 2024 – May 2025

Securitas, Boston, United States

- Monitored alarms, CCTV, and access logs; documented all events with accuracy and adherence to SOPs—strengthening attention to detail and compliance operations.
- Verified identities, maintained incident records, and supported investigations with timely reporting.
- Coordinated with supervisors to ensure procedural consistency and proper logging practices.

LEADERSHIP EXPERIENCE

Junior Executive for HR and Admin

March 2022 – Jan 2023

BRAC University Entrepreneurship Development Forum, Dhaka, Bangladesh

- Streamlined administrative workflows, improving tracking of member activities, event attendance, and internal operations.
- Collected and organized member engagement data to support leadership decision-making and event planning.
- Developed structured documentation systems for HR records, event logistics, and performance monitoring.
- Collaborated with executive teams to improve process efficiency across recruitment, events, and communication.

Student Fellows

June 2017 – Jan 2021

Samaanta Foundation, Kathmandu, Nepal

- Selected for a competitive national fellowship supporting first-generation and low-income scholars.
- Mentored underserved students, provided academic guidance, and supported community engagement activities.
- Conducted outreach to improve access to higher education among rural youth.

Additional Information & Interests

- First-generation college graduate; U.S. Permanent Resident with experience in Nepal, Bangladesh and the United States.
- **Interests:** public budgeting, financial integrity, government operations, fraud prevention
